

EPSON®

**Less Wasting.
More Saving.**

Epson Business Printers.

A Vision for the Future

As an industry leader in environmental sustainability, we know it's time for a change. Our mission is to help put an end to nearly a half-century of waste-generating laser printer designs that use bulky maintenance parts that could end up in a landfill. Epson business printers are powered by PrecisionCore® technology, allowing you to reduce your energy bills as well as your plastic waste output¹.

It's time to stop wasting and start saving with Epson business printers.

Powered by PrecisionCore

With over 40 years of expertise, Epson has perfected the chip manufacturing process. Our business printers are powered by PrecisionCore, advanced print chip technology that is disruptively simple, smart and clean.

PrecisionCore Print Chip
1.33 inches:
400 nozzles x 2 rows

WorkForce® Enterprise AM Series printer shown with optional accessories.

Simple

Engineered for Reliable Performance

The all-in-one chip design contains the printing parts of a 4-color printer, which means fewer parts that can break down.

Smart

Built for Productivity

This scalable and modular solution delivers consistent quality with no warm-up time required, resulting in less downtime and fast first page out.

Clean

Designed for Efficiency

Heat-Free technology is designed for efficient ink usage and low power consumption to help minimize waste and decrease energy consumption.
